Repository Structure

- Compliance: The repository has a clear backend/frontend structure, configuration files, documentation, requirements, Docker files, and tests. An examples directory is absent.
- Missing Files: Examples directory, config/rule-manifest.json referenced by README.md
- Organization: The project is well organized into backend application modules, frontend components, configuration, documentation, experiments, tests, and utility scripts.

README Analysis:

- Quality: README.md is detailed and well structured, covering the project purpose, architecture, workflows, installation, configuration, quick start, repository structure, and development commands.
- Project description: Yes
- Installation: Yes
- Usage examples: Partial
- Contribution guidelines: No
- License specified: Yes
- Badges present: Yes

Documentation:

- Test present: Yes
- Document quality: Good: the repository contains a docs directory, README.md includes extensive technical documentation, and the project includes workflow and experiment documentation.
- Outdated content: Yes

Key Shortcomings:

- The README.md references config/rule-manifest.json, but this file is not present in the repository tree.
- No dedicated examples directory or concrete sample inputs and outputs is provided.
- No contribution guidelines are documented.

Recommendations:

- Add or correct the referenced config/rule-manifest.json file and verify all README.md links.
- Provide an examples directory with representative inputs, commands, and expected outputs.
- Add contribution guidelines covering development setup, testing, code style, and pull request requirements.
